## Lampard School Sports Hall Project

Welcome to our 3rd newsletter for  
the school sports hall project

The groundworks are progressing well and all of the sub-structure blockwork is taking great shape as the walls are being built up all accross the site.

The beam and block floor has been delivered to site and this will start to be lifted into place from next week.

As it's been half term this week, we've made the most of the quieter period and have installed the new drainage runs across the lower car park; all ready to connect into the new building at a later date.

We've also installed some fun new play equipment by the forest school area!
